

I feel it is important to limit the number of outlets a broadcast company can own. We need more than one voice to tell us what is happening in our country. It is the only way that we can have a true democracy: by getting all the information. One voice will not do the job. In the town where we live the radio plays the news every hour. It is the same news being simulcast to the other radio stations in the country. What does a child abduction in Alabama have to do with us in Alaska? Does everyone have to hear Rush Limbah, or can we have other voices as well.

LIMIT BROADCAST OWNERSHIP! thank you very much!
